

Greetings,

SCC-Environmental Health has a total of 562 food, pool, lodging, body art, camping, and manufactured home facilities. We hope all of which had a successful 2019. We wanted to share a few items to kick off the new year. Our big news being that Michele Williams has just joined our program as the new Public Health Sanitarian. Laurie Diaby moved into a new role within the department and Ed Thurman, Jessica McEwen and Tracey-Shug-Peterson will continue to be familiar faces for all of you in 2020.

As always additional program information and resources can be found at: <https://www.sccwi.gov/238/Licensing-Inspections>

Top Violations in 2019

Facility Type	#1 Violation	#2 Violation	#3 Violation
Food	Improper Hold Temp (Cold, Hot, Cooling)	Consumer Advisory	Raw Meats/Eggs stored
Pool	Chemical Concentrations	Flowmeter, valves and gauges	Combined Chlorine
Lodging	General Maintenance/Clean	Smoke Detection	Building Code
Body Art	Exposure Control Plan	After Care Instructions	Storage of Inks
Campground	Backflow prevention	Smoke detection	General maintenance/clean
Manufactured	Occupants maintain their sites clean	Permit	Physical Layout

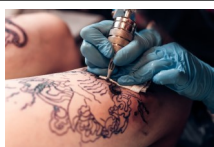

Welcome Michele Williams !!!

We would like to welcome and introduce St. Croix County's new Public Health Sanitarian; Michele Williams!

Actually we should say *welcome back* because Michele worked in our department from 1999 to 2002. She grew up in St. Croix County and comes to us with 20 years of experience as an inspector. For the last 15 years she had worked in Pierce County.

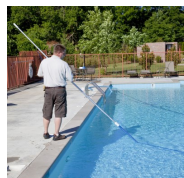

If You are Planning a New Business or a Remodel...

First complete our on-line plan review: <https://www.sccwi.gov/FormCenter/Public-Health-6/Plan-Review-72> This will inform you of the requirements, link you to your assigned inspector in our program, and provide you the appropriate building inspector and zoning office contacts. Then when you are within 30 days of opening, complete an online application at: <https://www.sccwi.gov/FormCenter/Public-Health-6/License-Application-49>

Body Art Reminders:

SCC Body Art Practitioners must complete a bloodborne pathogen course every 24 months. Body art shops must keep their exposure controls plans current and reviewed by staff. For more info: <https://www.sccwi.gov/284/Tattoo-Body-Piercing-Establishments>

Pool Update:

Last year pool operators worked with Jessica McEwen regarding their monthly pool reports. In 2020, Jessica will also be conducting pool inspections.

Reinspection Fees

We want to remind all facilities that within our fee schedule is a *reinspection fee*. This additional fee can be assigned when facilities have failed to correct items that were listed on a report for reinspection. So if your inspector has notified you that you will have a reinspection be certain that all items are corrected. If for some reason you have not completed the items, contact your inspector before they arrive for the reinspection.

The reinspection fees **are not** charged for the 1st reinspection. They are charged if the items listed for reinspection were not completed by the 1st reinspection and we have to come back again. Here are the fees:

Re-Insp fee for restaurants, lodging, pools, campgrounds, body art and rec ed. Camps.	\$190.00
Retail Food: Large Potentially Hazardous	\$568.00
Retail Food: Small Potentially Hazardous	\$241.00
Retail Food: Large Non-Potentially Hazardous	\$241.00
Retail Food: Very Small non-Potentially Hazardous	\$114.00
Retail Food: Very Small Potentially Hazardous	\$114.00
Retail Food: Not Engaged in Food Processing	\$114.00

BIG 4 FOOD Safety

SCC-Public Health launched its Big 4 Food Safety Campaign. This campaign focuses on the key food safety controls: clean hands, food handler health, no barehand contact, and foods temps.

The campaign includes a free course, exam, and toolkit that is available at:

<https://www.sccwi.gov/922/Big-4-Food-Safety>
